

# GeoResGlobe Layers Catalogue

 @Version 1.0.46 - February 2024 - 536 Layers represented.

 For the majority of layers, the webservice link has been provided below. This may not be available if the configured service is secured, a Globe specific service or if the layer references multiple services. Please note that [\*] is a count of available sublayers rather than a reflection of the layer id.

## Feature actions

Name	What it does	Layers
Advanced Intersect Report	Finds anything that overlaps your area and creates a report in Excel.	All layers
Buffer	Can create a buffer around a boundary between - 10,000 and 10,000 metres	All layers
GSQ Open Data Portal	Searches for data and or reports associated with the selected feature/s in the <a href="#">GSQ Open Data Portal</a> .	All permit layers, Report index, Boreholes, Seismic survey 2D, Seismic survey 3D, Seismic survey deep, Airborne geophysics layers, Magnetotelluric survey and Hyperspectral survey

Field Inspection Report	Creates a PDF and/or CSV of the points of an area can select whether you would like accesses and/or surface areas depending on the layer	Exploration permits-mineral development licence-application and grant Production permits-mining claim application and grant Production permits-mining lease application and grant Infrastructure permits-mining lease application and grant
Generate short report – Permit template	Creates a short report as a PDF of the attributes of a feature with a link to QDEX Reports	All permit layers except point data under historic production permits
Generate short report – Generic template	Creates a short report as a PDF of the attributes of a feature	All layers except the permit layers as above
Intersect	Finds anything that overlaps your area between - 10,000 and 10,000 metres	All layers
Intersect Topics	Uses a topic and any chosen layer/s to show intersections	All topics except the “Topography” one
